

## STREAMS INSPECTION AND EVALUATION, LUGANO – SWITZERLAND

The project concerns the inspection and evaluation of channels and underground watercourses in Lugano. Total length: around 2'000 m. Visual inspections of watercourses have been carried out with remote control (video inspection) or inspection of pipe watercourses have been carried out depending on accessibility and pipe diameter. After the report delivery, the analysis and evaluation of the conditions – necessary for the general wastewater disposal plan – have been carried out.

Client:  
Municipality of Lugano

Cost:  
2.40 Mio CHF

Period:  
2010 – 2012
